

Would your organization benefit by having a technology-adept Health IT intern?

The U.S. Department of Labor-funded HeW Consortium currently has qualified students, **located throughout Washington State**, who are seeking internship opportunities to apply the skills they've acquired in Health IT degree and certificate programs.

How interns might benefit your organization:

- Provide technical assistance to clinic staff
- Offer fresh perspectives and develop new solutions
- Integrate the latest tools and techniques
- Manage/design databases
- Analyze health data
- Plan, install, maintain, and repair PC hardware and software components and systems
- Implement proper troubleshooting methods for connectivity issues

Student specializations include:

- Health IT Networking and Security
- Database Management & Design
- Data Analytics
- Medical Office Assistant
- Mobile Software Development/Mobile Device Management

Internships can be virtual, onsite, or a combination. Duration and number of hours/week vary according to the preferences of the organization and the student's schedule.

Contact us to discuss your interest and needs! We will work with you to answer questions, discuss options, and develop an internship program that meets your needs and provides valuable learning opportunities for students in our health IT grant programs. Contact Pam Heeke at pam.heeke@bellevuecollege.edu.

The Health eWorkforce (HeW) Consortium, led by Bellevue College and funded by the Department of Labor, is meeting the needs of healthcare employers in Washington State by providing health IT training to technology-adept veterans, displaced workers, and others.

This workforce solution is 100% funded by an \$11.7m grant awarded by the U.S. Department of Labor's Employment and Training Administration. The solution was created by the grantee and does not necessarily reflect the official position of the U.S. Department of Labor. The Department of Labor makes no guarantees, warranties, or assurances of any kind, express or implied, with respect to such information, including any information on linked sites and including, but not limited to, accuracy of the information or its completeness, timeliness, usefulness, adequacy, continued availability or ownership.
